kgowda1092

Associate Software Engineer with 1 year of experience in web-based application development, currently working on a product-based project to deliver impactful solutions. Experienced in **ReactJS** for 18+ months, building modern, responsive, and cohesive web applications using **JavaScript**, **ShadCN**, and **TailwindCSS**. Looking to strengthen expertise in modern front-end frameworks, contribute to impactful product development, and progress into a senior developer role with key responsibilities in technical decision-making.

🧠 Skills

Programming
JavaScript | TypeScript | Java | Python | HTML | C

Frontend tools

Learning Devops Technologies (Docker,Kubernetes and Terraform)   Bengaluru, India

KT technologies   2022/09 – 2022/10
Python and Machine Learning   Bengaluru, India

📂 Projects

Torry Harris Marketplace (Digital Product)   2024/06 – present
- As part of the **product engineering team**, I develop components and
  pages for a marketplace platform similar to **Amazon**.
- My responsibilities include **feature implementation, migration
  tasks**, and working on various portals such as admin, vendor, and
  storefront. I utilize **ShadCN**,**Redux and React Qurery** to create
  modern, responsive interfaces.
- The platform serves multiple user types, including vendors,
  customers, and store owners, enabling seamless online transactions.

LMS Project @Torry Harris   2024/01 – 2024/06
- Creating a LMS application using microservices architecture for the
  ongoing training professionals at Torry Harris.
- I personally worked on creating pages and components for Admin
  Dashboard and API integration.

E-commerce web-app built with React ⧉   2023/07
• Successfully developed and deployed a dynamic and responsive
website using the latest version of React and Strapi.
• Incorporated features like Hooks, Context API, and Custom APIs and
endpoints to enhance functionality.

📑 Certification Programs

Torry Harris Employee of Month   **HackerRank**
Got recognization for solving some   Python
challenges in the month in my team

                                            Complete Python Developer
Web Development Boot Camp   ZTM
Udemy (Andrie neagoie)

🏅 Awards and Achievements

Has participated in Technical hackathon competitions like Project Building, Debugging

Has participated Vedic Math state level competition twice.
